Healthcare

Your **partner** in **healthcare**

The NCS Healthcare Industry Practice focuses on creating value for care providers, managed care organisations, policy-making agencies, pharmaceutical and life sciences companies and ancillary healthcare service providers.

NCS **healthcare** solutions

In our 25 years of experience, we have worked closely with both local and overseas health authorities and hospitals in projects that place great emphasis on patient centric services across the continuum of care, as well as on preventive care and public health information management. When it comes to total integrated Information Technology (IT) solutions, our ability to manage a multi-vendor environment ensures that our clients benefit from the best range of services and products.

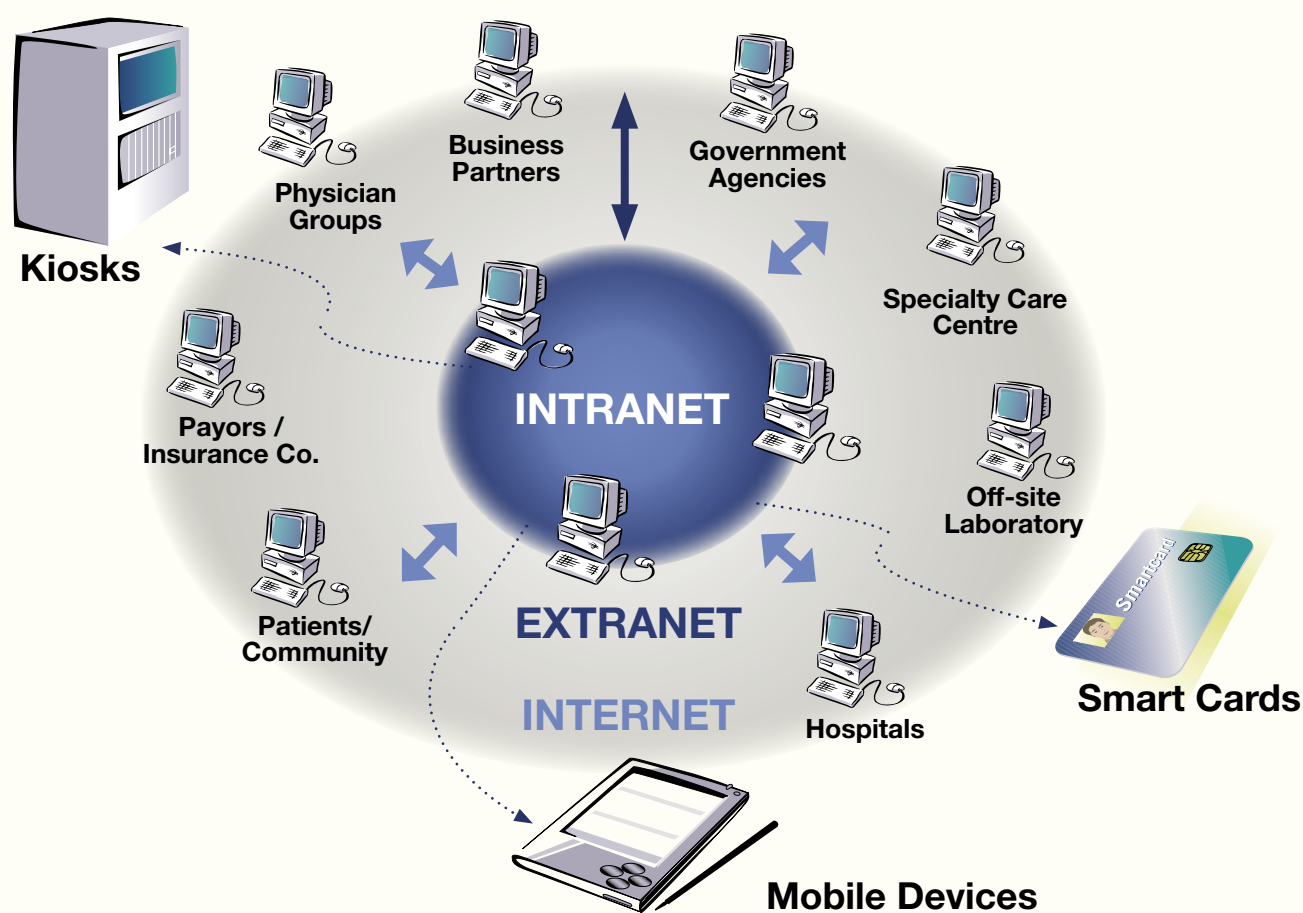

Many of our healthcare consultants have over 10 years experience in Health Information Management, Data Standardisation, Process Review and Improvement, Records Management, Systems Design, Development and Implementation, Infrastructure Setup and Management, including the following specific credentials:

- Strategic planning and implementation of National Health Information Infrastructure

- Consultancy in health information management, data standardisation, as well as business process review and improvement.
- Public health information systems implementation
- Hospital and clinic information systems implementation
- Pre-care and post-care systems implementation
- Financial, billing and claim systems implementation
- Healthcare e-services implementation
- Casemix principles and clinical costing systems and their application in health service management and funding
- Data management, clinical benchmarking and reporting clinical outcomes and activity data
- Total outsourcing which includes data centre, facilities management and application management services

What **NCS** brings to you

We plan and deliver application systems to improve the efficiency and quality of care delivery, as well as networks linking the healthcare community for supply chain activities and secure sharing of medical information.
