

# OneCal™

Organise Your World

OneCal™ is the first platform to integrate personal calendars, both government and personal alerts and lifestyle information, presented in a single view, accessible from any mobile device.

## CHALLENGES

The amount of information that is received daily for work or leisure, from various sources can be overwhelming. From appointments to meeting requests, event invitations, deadlines, reminders and email alerts, it is easy for you to miss out important dates.

As part of NCS' suite of enterprise mobility solutions, OneCal™ streamlines events across different calendars from corporate and enterprise portals through web interface into one view and sets alerts for important dates, so as to increase efficiency. In addition, user's experience is further enhanced with a rich layer of lifestyle information, social sharing features, location-aware events, deals and directional maps.

## SOLUTION

NCS builds OneCal™ that can synchronize with multiple calendars and a scheduler and enables alert notification on your smartphones and mobile tablets. This allows user to manage schedules, appointments and events readily in a single view and control.

For organisations, they can plug into the OneCal™ ecosystem to immediately connect with agencies, partners and users. Moreover, OneCal™ can be the marketing tool to promote your events to your customers and users with the additional features of social sharing for viral outreach.

## BENEFITS

OneCal™ is changing the way people use their calendars. It helps to integrate with corporate and enterprise portal for a seamless web view interface where it enables users to keep track of the important dates on an integrated schedule and personalised services from their closed groups and keep tabs on all these dates effectively. Equipped with location-sensitive and map capabilities, users are able to share the latest happening for deals and events on social media platforms and plan their routes.

### Increase Productivity and Efficiency

- Better organizing and tracking of work and personal schedules
- Able to track tons of schedules and set reminder to important dates in a single view and control
- Cost-effective deployment based on hosted model to reduce cost of investment and faster go-to-market with secured delivery of content while safeguarding the privacy of users

### Optimise User's Experience

- Embrace social media and viral sharing of latest happening for deals and events
- Location-based capabilities to create more intuitive user's experience

## User-Friendly

- Timely personalised alerts and event notifications from both government and private sectors in an aggregated platform
- Search function by events, alerts and dates allows quick and easy retrieval of information
- Differentiate colour codes as indicator for alerts and events within a single at-a-glance view
- Choice of daily, weekly and monthly views, expandable for more details, with ease of switching between views

- Bi-directional synchronization with multiple calendars (iPhone Calendar, Facebook, Google, Yahoo, Microsoft Exchange)
- Add and edit personal events
- Social sharing of events and promotions (Facebook, Twitter, Email, SMS)
- Location aware of events and deals on Google map
- Click to access Google map with transport information

## WHAT DIFFERENTIATES OneCal™

OneCal™ creates a wholesome and meaningful user's experience that can connect and value-add to your users:

- OneCal™ integrates with corporate and enterprise portal for a seamless web view interface
- Enable user to sign-in for closed groups and access personalized services and calendar
- A 'Remind Me' function can be easily embedded on your website to give a synchronized calendar view for all personal calendar, events, deals and alerts
- Aggregated calendar platform for personal calendars, events, deals and reminders in single view and control
