

Go Green Let's Virtualise

Do more with less

The IT Challenges Today

Today, many CIOs and IT Managers face a long list of challenges to solve the explosion in the scope and complexity of IT platforms adopted in 1990s. The demanding business environment, coupled with exponential data growth has led to rapid expansion of server counts, storage volumes and network complexity over the years.

In view of high infrastructure costs, slow response time and an inconsistently managed infrastructure, organisations are turning to virtualisation to radically turnaround and improve server and storage utilisation efficiently and cost-effectively.

NCS Virtualisation Approach

Virtualisation provides the best IT investment.

As an independent system integrator, NCS has a pool of vendors' certified architects and consultants with proven track record in deploying successful infrastructure. Our methodology helps to put in place the right consolidation strategy to provide an integrated virtualisation solution that simplifies and optimises your resources. This is reinforced with our continuous hardware support through technology refresh.

From providing consultancy services on assessment, resource capacity planning to designing, installing and configuring your infrastructure consolidation and containment and virtual desktop management, to a valuable portfolio of designing and building your Green Data Center Plan, Private Cloud, Business Continuity Plan and Disaster Recovery Solutions, NCS is committed to enable you get the most out of Virtualisation and Private Cloud locally and regionally.

CHALLENGES

- Large number of "one-application per box" servers
- High operational and infrastructure costs
- Slow response time in managing business and operational changes
- Inconsistently managed infrastructure
- Revenue lost due to frequent downtime

SOLUTIONS

- Design, install and configure server consolidation and containment
- Provide consultancy services on resource capacity and optimisation planning
- Design and build Business Continuity Plan and Disaster Recovery Solutions
- Design, install and configure Virtual Desktop Management
- Design and build Private Cloud

BENEFITS

- Tap on largest pool of NCS vendors' certified professionals
- Achieve bottom-line results by reducing infrastructure costs
- Respond faster to business and operational needs
- Simplify operations and increase efficient use of resources
- Deploy scalable strategy to meet organisational changes

NCS Professional Services Offerings

Our approach starts with understanding your organisation's business objectives and needs, your existing infrastructure and challenges. Enabling us to tailor and provide a suite of service offerings that suit your IT needs:

- Virtualisation Assessment
- Cost Savings Assessment
- Risk Management Assessment
- Health-Check
- Plan & Design
- Business Continuity & Disaster Recovery Services
- Cloud Computing (build public & private cloud)
- Infrastructure and Data Hosting Services
- Integrated Virtualisation Services

End-to-end Virtualisation Project Management

Less is More

30% greater consolidation ratio. Up to 50% in storage savings. Reduce Total Cost of Ownership by 30-70%. Zero downtime and data lost for virtual machines. Achieve higher server utilisation rate of up to 80% vs typical rate of 30%. Up to 20% additional of energy savings. Cut capital and operational costs by over 50% for all applications.

Virtualisation saves your business working capital, reduces server room rental, overhead administration and delivers an improved IT service level to meet your business and organisational needs.

In addition, it enables you to enjoy a seamless blend of efficiencies and cost effectiveness by deploying private cloud in your environment.
