

# IT Optimisation

Optimising business through technology

## CREATING VALUE THROUGH TECHNOLOGY TRANSFORMATION

IT Optimisation is NCS' advisory service that aims to help organisation assess and plan its IT resources to support business growth and optimise business value.

We work with our customers to define IT Strategy and Blueprint that guide the future IT efforts as well as to identify innovative IT solutions that facilitate the business processes. We also recommend improvements to the customers' IT organisations to support the blueprint as the organisations scale to meet their existing and future needs.

The blueprint specifies the business architecture, data architecture, application architecture and technical architecture as well as realigns the IT organisation and capabilities required to support the IT blueprint.

## WHY NCS?

- NCS has one of the largest pools of dedicated, highly skilled and multi-disciplinary engineers, consultants and project managers in the region.
- Leverage on our pool of 9,000 business and IT professionals to form the expert project team.
- Flexibility to assemble culturally sensitive, knowledgeable and relevant teams that bring innate understanding of IT issues unique to different geographies.

## CHALLENGES

- Management requires that the IT landscape to be inventoried to better align the business needs
- Multiple applications reaching end of shelf life
- New organisations being set-up and need an IT blueprint to be defined
- Escalating IT costs
- Making business relevance of emerging technologies

## SOLUTION

- Commences with a strategic review of the business to clarify business needs and concludes with a set of comprehensive plans to deliver IT solutions that address these needs

## BENEFITS

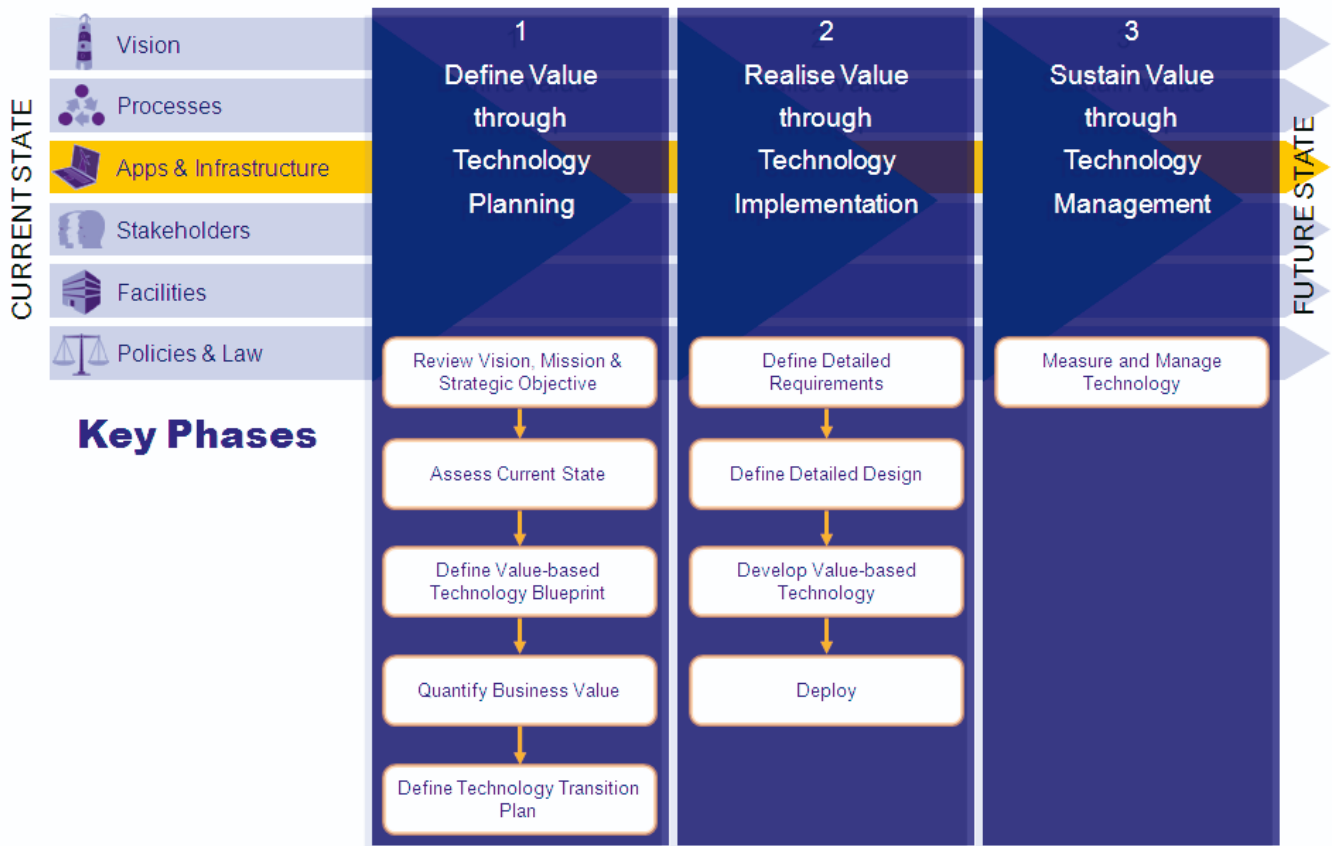

- Encouraged more informed decision on IT investments
- Clarified scope and business requirements for IT prior to design
- Ensured IT solutions are better aligned to address business needs
- Clarified the business value of IT

# NCS TECHNOLOGY TRANSFORMATION & OPTIMISATION APPROACH

To transform and optimise an IT operation require careful assessment, planning, execution and management. NCS Bizval™, our patented & value-based suite of methodologies guide organisations through their transformation journey and

clarify the desired value to be delivered. As our customers embark on their journey to ensure a robust IT landscape that meet business needs, Bizval™ provides a roadmap for the transformation process.

## NCS Technology Transformation & Optimisation Approach

## NCS IT OPTIMISATION AREAS OF EXPERTISE

IT Optimisation is performed around the key business processes and focuses on the following domains:

- Data Architecture
- Application Architecture
- Technology Architecture

The IT organisation that provides the operation support will be evaluated for improvement.

With the IT Roadmap defined, a transition and implementation plan will be recommended to ensure that the target values are achieved with proper implementation.
