

Emerging Technologies Consultancy

Harnessing Technology to Drive Business Innovations

STAYING AHEAD OF THE TECHNOLOGY CURVE

IT is advancing at a breakneck pace. With each passing day, new developments are materialising with greater frequency, profoundly changing the way we work, live and interact with one another.

By keeping abreast of new technologies, and exploiting them in a strategic manner, organisations stand to improve business agility, gain competitive advantage, boost productivity, enhance customer satisfaction and optimise IT spend.

To do otherwise is to risk falling behind the competition and to be exposed to disruptive business models powered by emerging technologies.

WHY NCS?

At NCS, we believe that emerging technologies should be examined and implemented through a structured and holistic approach that is strongly anchored to the organisation's strategic objectives and goals.

Our unique distinction of being a "one-stop" solution provider allows us to offer a comprehensive suite of services that will help your organisation derive the greatest value from technology advancements.

The use of our patented Bizval™ Suite of Methodologies aligns key organisation components of vision, processes, applications, infrastructure, stakeholders, facilities and policies & law to enable a smooth and successful transition.

CHALLENGES

- Sifting through the technology hype, separating the wheat from the chaff
- Leveraging emerging technologies to stay ahead of the competition
- Formulating the right strategies and approaches for implementation
- Prioritising technology initiatives to support business objectives
- Building the business case for technology investments

SOLUTIONS

- Emerging Technology Immersion
- IT Strategy & Roadmap Development
- Enterprise Architecture Planning & Design
- Proof-of-Concept Development
- Technology Adoption Planning

BENEFITS

- Establishment of a concrete appreciation of the specific technology to support informed decisions
- Formulation of a clear implementation strategy to amplify potential benefits, maximise reuse and reduce risks
- Development of return of investment and total cost of ownership analysis to substantiate technology investment decisions
