

# Go Green Let's Protect

Data storage - protect completely,  
manage easily, control automatically

## Today's Storage Environment

The advent of the internet has opened the floodgates to information—even more so with broadband speeds reaching a capability of up to 1GB per second. In fact, the amount of digital information created and replicated worldwide is growing at 60 per cent each year.

Not only do organisations need to keep and archive their data, they need to store and manage it for easy access. NCS is committed to creating innovative storage offerings and solutions that critically addresses your growing storage challenges.

## NCS Suite Of Storage Services

### Storage Consulting and Assessment Services

- Data Protection & Replication Services
- Storage Virtualisation and SAN Readiness Assessment
- Storage Optimisation Services
- Disaster Recovery Services
- Green IT

### Storage Technology Services

- Storage Design & Implementation Services
- Storage Support & Maintenance Services

## DO YOU KNOW

- Research shows the average storage use for an enterprise-level organisation is less than 40 per cent. If these organisations are able to use their storage platforms effectively, new hardware purchases can be delayed for a year or more.
- Surveys have shown that a single incident of data loss can cost a company approximately US\$10,000.

## BENEFITS

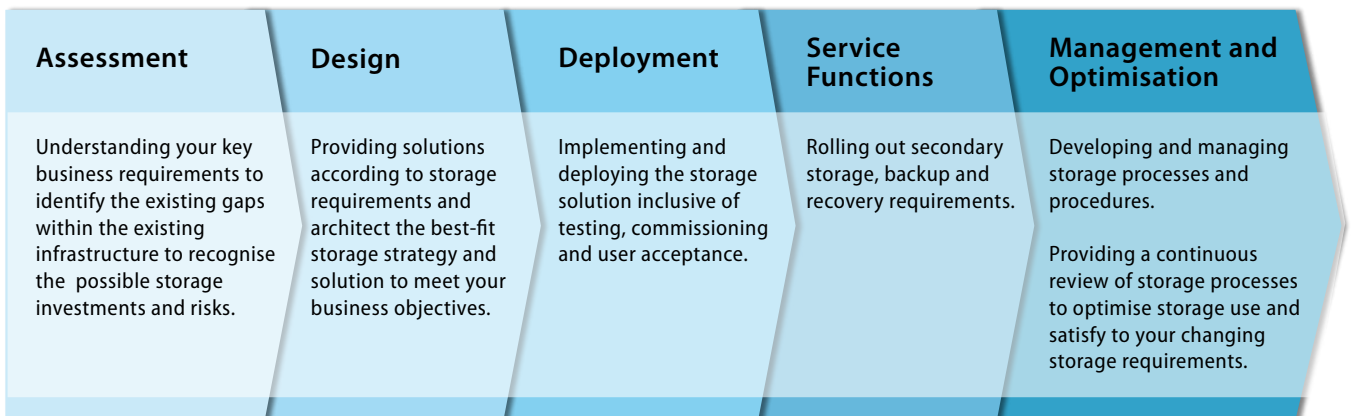

- Boost storage ROI through improved asset utilisation
- Minimise your downtime by identifying potential problems
- Effectively respond to change driven by business units
- Advance the business and IT objectives of your information-driven enterprise
- Optimise your IT operations to industry best practices
- Reduce data centre operation costs and complexity
- Proactively manage compliance

NCS will help you understand the benefits of each solution and build a plan that will guide you towards the most logical choice. Our solution will meet your increased demand and expectation on service level for backup, recovery and compliance objectives. These benefits translate into greater cost savings in the long run, giving you the operational efficiency to meet various business needs and IT demands.

## NCS Storage Management Process

Our full suite of services revolves around a storage management lifecycle from assessment to design, deployment, management and optimisation.

## Working With NCS

NCS helps you protect your storage completely, manage it easily and control it automatically. We have a proven track record in successful implementation and deployment of storage solutions. Working with NCS will also give you the ability to tap on a large pool of certified professionals and technical consultants from leading IT partners.

With us, you will be able to:

- Partner with the largest SI that offers one-stop solutions
- Expect a consistent and dependable service delivery
- Reduce the total cost of storing your data
- Protect and retain your information while still having continuous access to it

We have the expertise to guide you towards best practices and to turn your business requirements into a storage solution best suited for your organisation.
